Thin Solid Films 370 (2000) 323–328

thin solid films

www.elsevier.com/locate/tsf

Subject Index of Volume 370

Absorption
Vacuum-deposited films of mesogen of 4-*n*-pentyl-4″-cyano-*p*-terphenyl: their electronic spectra and molecular aggregate structures, 285
Absorption coefficient
Structural studies and influence of the structure on the electrical and optical properties of microcrystalline silicon thin films produced by RF sputtering, 128
Adhesion
Internal stress and adhesion of amorphous Ni–Cu–P alloy on aluminum, 106
Alignment layer
Electric force microscopy study of the surface electrostatic property of rubbed polyimide alignment layers, 238
Alkoxide solution
Preparation and properties of TiN and AlN films from alkoxide solution by thermal plasma CVD method, 137
Preparation of $(Ti_{1-x}Al_x)N$ films from mixed alkoxide solutions by plasma CVD, 146
Alkoxy-cyanobiphenyls
Vacuum-deposited films of mesogen of 4-*n*-pentyl-4″-cyano-*p*-terphenyl: their electronic spectra and molecular aggregate structures, 285
Alloys
Stress development in FeAl8 thin films during heat treatment, 315
Aluminium
Microstructure-related resistivity change after chemical–mechanical polish of Al and W thin films, 96
Aluminium oxide
Plasma spraying of stainless-steel particles coated with an alumina shell, 213
Aluminum nitride
Epitaxial aluminum nitride films on sapphire formed by pulsed laser deposition, 1
Preparation and properties of TiN and AlN films from alkoxide solution by thermal plasma CVD method, 137
Annealing
Preparation and characterization of $Bi_2Ti_2O_7$ thin films by chemical solution deposition technique, 30
Characterization of ultrasonic spray pyrolyzed tungsten oxide thin films, 38
Atomic force microscopy
Surface characterization of the monolayer and Langmuir–Blodgett films of tetra-tert-butyl-copper phthalocyanine, 278
Atomic layer deposition
Characterization of titanium dioxide atomic layer growth from titanium ethoxide and water, 163
Atomistic dynamics
Cluster diffusion and surface morphological transitions on Pt(111) via reptation and concerted motion, 179
Auger electron spectroscopy
Tungsten chemical vapor deposition using tungsten hexacarbonyl: microstructure of as-deposited and annealed films, 114

Biomaterials
An air-stable biomimetic Langmuir–Blodgett bilayer, 294
Birefringence
Propagation loss and birefringence properties around 1.55 μm of polymeric optical waveguides fabricated with cross-linked silicone, 311
Bonding state
Reactive magnetron sputtering of indium tin oxide films on acrylics – morphology and bonding state, 33

Carbides
Chemical vapour deposition of molybdenum carbides: aspects of phase stability, 203
CdS/CdTe
Study of in situ $CdCl_2$ treatment on CSS deposited CdTe films and CdS/CdTe solar cells, 299
CdTe quantum dots
Deposition of tellurium films by decomposition of electrochemically-generated H_2Te: application to radiative cooling devices, 101
Chemical bath deposition
Chemical bath deposition of different phases of copper selenide thin films by controlling bath parameters, 89
Chemical vapor deposition
Tungsten chemical vapor deposition using tungsten hexacarbonyl: microstructure of as-deposited and annealed films, 114
Preparation of $(Ti_{1-x}Al_x)N$ films from mixed alkoxide solutions by plasma CVD, 146
Density functional study of silane adsorption onto Si(100) surface, 192
Chemical vapour deposition of molybdenum carbides: aspects of phase stability, 203
Chemical vapor deposition-diamond films
Field-emission characteristics of chemical vapor deposition-diamond films, 63
Chemisorption
Density functional study of silane adsorption onto Si(100) surface, 192
Close spaced sublimation
Study of in situ $CdCl_2$ treatment on CSS deposited CdTe films and CdS/CdTe solar cells, 299

PII: S0040-6090(00)01020-8

Clusters
Cluster diffusion and surface morphological transitions on Pt(111) via reptation and concerted motion, 179
Coatings
Plasma spraying of stainless-steel particles coated with an alumina shell, 213
Supertough wear-resistant coatings with 'chameleon' surface adaptation, 223
A unified theoretical model for tensile and compressive residual film stress, 232
Conductivity
Structural studies and influence of the structure on the electrical and optical properties of microcrystalline silicon thin films produced by RF sputtering, 128
Copper selenide thin film
Chemical bath deposition of different phases of copper selenide thin films by controlling bath parameters, 89
Cross-linked silicone
Propagation loss and birefringence properties around 1.55 μm of polymeric optical waveguides fabricated with cross-linked silicone, 311
Crystal structure
Crystal structure of GeTe and $Ge_2Sb_2Te_5$ meta-stable phase, 258

Deposition process
Sputter deposition of NiTi thin film shape memory alloy using a heated target, 18
Characterization of ultrasonic spray pyrolyzed tungsten oxide thin films, 38
Submonolayer and single crystal film from ligand-stabilized silver nanoparticles, 85
Deposition and optical studies of silicon carbide nitride thin films, 151
Vacuum-deposited films of mesogen of 4-*n*-pentyl-4″-cyano-*p*-terphenyl: their electronic spectra and molecular aggregate structures, 285
Dielectric properties
Dielectric properties of plasma-polymerized diphenyl thin films, 78
Diffusion Barrier
Bias sputtered Ta modified diffusion barrier in Cu/Ta(V_b)/Si(111) structures, 10
Dynamic contact angle
Surface characterization of the monolayer and Langmuir–Blodgett films of tetra-tert-butyl-copper phthalocyanine, 278

Electric force microscopy
Electric force microscopy study of the surface electrostatic property of rubbed polyimide alignment layers, 238
Electrical properties and measurements
Preparation and characterization of $Bi_2Ti_2O_7$ thin films by chemical solution deposition technique, 30
Fabrication of a new photoelectric conversion system by using a self-assembling technique, 248
Electroless Ni–Cu–P
Internal stress and adhesion of amorphous Ni–Cu–P alloy on aluminum, 106
Electron microscopy
Characterization of indium tin oxide film and practical ITO film by electron microscopy, 155
Electrostatic property
Electric force microscopy study of the surface electrostatic property of rubbed polyimide alignment layers, 238
Epitaxy
Epitaxial aluminum nitride films on sapphire formed by pulsed laser deposition, 1
Phase development in pulsed laser deposited $Pb[Yb_{1/2}Nb_{1/2}]O_3$-$PbTiO_3$ thin films, 70
Erbium
Optical properties of Er^{3+}-doped SiO_2-GeO_2-Al_2O_3 planar waveguide fabricated by sol–gel processes, 243

Ferroelectric thin film heterostructures
Phase development in pulsed laser deposited $Pb[Yb_{1/2}Nb_{1/2}]O_3$-$PbTiO_3$ thin films, 70
Field emission
Field-emission characteristics of chemical vapor deposition-diamond films, 63
Fluorescence
Vacuum-deposited films of mesogen of 4-*n*-pentyl-4″-cyano-*p*-terphenyl: their electronic spectra and molecular aggregate structures, 285
Fourier transform infrared spectroscopy
In situ Fourier transform P-polarized infrared reflection absorption spectroscopic investigation of an interface properties of SiO_2/Si(100) deposited using electron cyclotron resonance microwave plasma at room temperature, 199

$Ge_2Sb_2Te_5$
Crystal structure of GeTe and $Ge_2Sb_2Te_5$ meta-stable phase, 258
GeTe
Crystal structure of GeTe and $Ge_2Sb_2Te_5$ meta-stable phase, 258
Glow discharge
Dielectric properties of plasma-polymerized diphenyl thin films, 78
Growth mechanism
Characterization of titanium dioxide atomic layer growth from titanium ethoxide and water, 163

Hardness
Supertough wear-resistant coatings with 'chameleon' surface adaptation, 223
Heat treatment
Stress development in FeAl8 thin films during heat treatment, 315
Heterojunction cells
Dark and photoelectric conversion properties of p-MgPc/n-Si (Organic/Inorganic) heterojunction cells, 253
Hydrogen telluride
Deposition of tellurium films by decomposition of electrochemically-generated H_2Te: application to radiative cooling devices, 101

In situ $CdCl_2$ treatment
Study of in situ $CdCl_2$ treatment on CSS deposited CdTe films

and CdS/CdTe solar cells, 299
In situ observation
Vacuum-deposited films of mesogen of 4-*n*-pentyl-4″-cyano-*p*-terphenyl: their electronic spectra and molecular aggregate structures, 285
Indium oxide
Characterization of indium tin oxide film and practical ITO film by electron microscopy, 155
Indium tin oxide
Reactive magnetron sputtering of indium tin oxide films on acrylics – morphology and bonding state, 33
Infrared spectroscopy
Deposition and optical studies of silicon carbide nitride thin films, 151
Integrated optics
Optical properties of Er^{3+}-doped SiO_2-GeO_2-Al_2O_3 planar waveguide fabricated by sol–gel processes, 243
Interfaces
In situ Fourier transform P-polarized infrared reflection absorption spectroscopic investigation of an interface properties of SiO_2/Si(100) deposited using electron cyclotron resonance microwave plasma at room temperature, 199
Interfacial roughness and voids
High temperature cracking of tungsten polycide films on quartz substrate, 307
Internal stress
Internal stress and adhesion of amorphous Ni–Cu–P alloy on aluminum, 106

Langmuir–Blodgett films
Surface characterization of the monolayer and Langmuir–Blodgett films of tetra-tert-butyl-copper phthalocyanine, 278
An air-stable biomimetic Langmuir–Blodgett bilayer, 294
Laser ablation
Epitaxial aluminum nitride films on sapphire formed by pulsed laser deposition, 1
Phase development in pulsed laser deposited $Pb[Yb_{1/2}Nb_{1/2}]O_3$-$PbTiO_3$ thin films, 70
Lattice mismatch
The microstructure and mechanical properties of TaN/TiN and TaWN/TiN superlattice films, 45
Lead projections
Synthetic process of the sol–gel derived $Pb(Zr_{0.53}Ti_{0.47})O_3$ films using poly vinyl butyral binder, 5
Lead ytterbium niobate - lead titanate
Phase development in pulsed laser deposited $Pb[Yb_{1/2}Nb_{1/2}]O_3$-$PbTiO_3$ thin films, 70
Lead zirconate titinate
Synthetic process of the sol–gel derived $Pb(Zr_{0.53}Ti_{0.47})O_3$ films using poly vinyl butyral binder, 5
Low-dimensional structure
Face centred cubic cobalt ultrathin-layers in Au/Co(111) multilayers: a study by electron diffraction and by HREM, 186
Luminescence
Improvement of luminescence efficiency and photostability in polymer thin films, 262

Metal organic chemical vapour deposition
Structural and optical properties of yttria-stabilized-zirconia films grown by MOCVD, 173
Metallization
Bias sputtered Ta modified diffusion barrier in Cu/Ta(V_b)/Si(111) structures, 10
Microstructure-related resistivity change after chemical–mechanical polish of Al and W thin films, 96
Microcrystalline silicon
Structural studies and influence of the structure on the electrical and optical properties of microcrystalline silicon thin films produced by RF sputtering, 128
Microstructure
Reactive magnetron sputtering of indium tin oxide films on acrylics – morphology and bonding state, 33
Molecular dynamics
Cluster diffusion and surface morphological transitions on Pt(111) via reptation and concerted motion, 179
Molybdenum carbide
Chemical vapour deposition of molybdenum carbides: aspects of phase stability, 203
Multilayers
The microstructure and mechanical properties of TaN/TiN and TaWN/TiN superlattice films, 45

Nanocomposite
Supertough wear-resistant coatings with 'chameleon' surface adaptation, 223
Nanocrystalline Ag thin films
In-situ TEM observations of abnormal grain growth, coarsening, and substrate de-wetting in nanocrystalline Ag thin films, 54
Neural networks
Use of artificial neural networks to predict thickness and optical constants of thin films from reflectance data, 122
NiTi
Sputter deposition of NiTi thin film shape memory alloy using a heated target, 18

Optical properties
Use of artificial neural networks to predict thickness and optical constants of thin films from reflectance data, 122
Deposition and optical studies of silicon carbide nitride thin films, 151
Structural and optical properties of yttria-stabilized-zirconia films grown by MOCVD, 173
Fabrication of a new photoelectric conversion system by using a self-assembling technique, 248
Improvement of luminescence efficiency and photostability in polymer thin films, 262

Passive radiative cooling
Deposition of tellurium films by decomposition of electrochemically-generated H_2Te: application to radiative cooling devices, 101
Phase change
Crystal structure of GeTe and $Ge_2Sb_2Te_5$ meta-stable phase, 258
Phase transitions
Tungsten chemical vapor deposition using tungsten hexacarbonyl: microstructure of as-deposited and annealed films, 114
Photodegradation
Improvement of luminescence efficiency and photostability in

polymer thin films, 262
Photoelectric conversion
Dark and photoelectric conversion properties of p-MgPc/n-Si (Organic/Inorganic) heterojunction cells, 253
Photoluminescence
Deposition and photoluminescence of sol–gel derived Tb^{3+}:Zn_2SiO_4 films on SiO_2/Si, 50
Physical vapour deposition
The microstructure and mechanical properties of TaN/TiN and TaWN/TiN superlattice films, 45
A unified theoretical model for tensile and compressive residual film stress, 232
Planarization
Microstructure-related resistivity change after chemical–mechanical polish of Al and W thin films, 96
Plasma processing and deposition
Dielectric properties of plasma-polymerized diphenyl thin films, 78
Preparation and properties of TiN and AlN films from alkoxide solution by thermal plasma CVD method, 137
Preparation of $(Ti_{1-x}Al_x)N$ films from mixed alkoxide solutions by plasma CVD, 146
In situ Fourier transform P-polarized infrared reflection absorption spectroscopic investigation of an interface properties of SiO_2/Si(100) deposited using electron cyclotron resonance microwave plasma at room temperature, 199
Plasma spraying of stainless-steel particles coated with an alumina shell, 213
Plasma-etching
Field-emission characteristics of chemical vapor deposition-diamond films, 63
Platinum
Cluster diffusion and surface morphological transitions on Pt(111) via reptation and concerted motion, 179
Poly vinyl butyral
Synthetic process of the sol–gel derived $Pb(Zr_{0.53}Ti_{0.47})O_3$ films using poly vinyl butyral binder, 5
Poly(phenylenevinylene)
Improvement of luminescence efficiency and photostability in polymer thin films, 262
Polyimide
Electric force microscopy study of the surface electrostatic property of rubbed polyimide alignment layers, 238
Polymers
Dielectric properties of plasma-polymerized diphenyl thin films, 78
Polymer optical waveguides
Propagation loss and birefringence properties around 1.55 μm of polymeric optical waveguides fabricated with cross-linked silicone, 311
Process-related local stress
High temperature cracking of tungsten polycide films on quartz substrate, 307
Propagation loss
Propagation loss and birefringence properties around 1.55 μm of polymeric optical waveguides fabricated with cross-linked silicone, 311

Raman scattering
Structural studies and influence of the structure on the electrical and optical properties of microcrystalline silicon thin films produced by RF sputtering, 128
Raman spectroscopy
Field-emission characteristics of chemical vapor deposition-diamond films, 63
Reflection spectroscopy
Use of artificial neural networks to predict thickness and optical constants of thin films from reflectance data, 122
Titanium–aluminum–nitride coatings for satellite temperature control, 268
Resistivity
Preparation and characterization of $Bi_2Ti_2O_7$ thin films by chemical solution deposition technique, 30
Rietveld refinements
Crystal structure of GeTe and $Ge_2Sb_2Te_5$ meta-stable phase, 258

Saccharin
Internal stress and adhesion of amorphous Ni–Cu–P alloy on aluminum, 106
Scanning electron microscopy
Field-emission characteristics of chemical vapor deposition-diamond films, 63
Semiconductors
Characterization of ultrasonic spray pyrolyzed tungsten oxide thin films, 38
Chemical bath deposition of different phases of copper selenide thin films by controlling bath parameters, 89
Shape memory alloy
Sputter deposition of NiTi thin film shape memory alloy using a heated target, 18
Silane
Density functional study of silane adsorption onto Si(100) surface, 192
Silicon
Density functional study of silane adsorption onto Si(100) surface, 192
Silicon carbide
Deposition and optical studies of silicon carbide nitride thin films, 151
Silicon oxide
In situ Fourier transform P-polarized infrared reflection absorption spectroscopic investigation of an interface properties of SiO_2/Si(100) deposited using electron cyclotron resonance microwave plasma at room temperature, 199
Silver
Submonolayer and single crystal film from ligand-stabilized silver nanoparticles, 85
Single crystal films
Submonolayer and single crystal film from ligand-stabilized silver nanoparticles, 85
Sol–gel
Synthetic process of the sol–gel derived $Pb(Zr_{0.53}Ti_{0.47})O_3$ films using poly vinyl butyral binder, 5
Sol–gel method
Deposition and photoluminescence of sol–gel derived Tb^{3+}:Zn_2SiO_4 films on SiO_2/Si, 50
Sol–gel process
Optical properties of Er^{3+}-doped SiO_2-GeO_2-Al_2O_3 planar waveguide fabricated by sol–gel processes, 243

Solar cells
Characterization of indium tin oxide film and practical ITO film by electron microscopy, 155
Study of in situ $CdCl_2$ treatment on CSS deposited CdTe films and CdS/CdTe solar cells, 299
Space applications
Titanium–aluminum–nitride coatings for satellite temperature control, 268
Sputtering
Bias sputtered Ta modified diffusion barrier in Cu/Ta(V_b)/Si(111) structures, 10
Sputter deposition of NiTi thin film shape memory alloy using a heated target, 18
Titanium–aluminum–nitride coatings for satellite temperature control, 268
Steel
Plasma spraying of stainless-steel particles coated with an alumina shell, 213
Stress
A unified theoretical model for tensile and compressive residual film stress, 232
Stress development in FeAl8 thin films during heat treatment, 315
Structural properties
Stress development in FeAl8 thin films during heat treatment, 315
Structure and morphology
Face centred cubic cobalt ultrathin-layers in Au/Co(111) multilayers: a study by electron diffraction and by HREM, 186
Substrate de-wetting
In-situ TEM observations of abnormal grain growth, coarsening, and substrate de-wetting in nanocrystalline Ag thin films, 54
Superhardness effect
The microstructure and mechanical properties of TaN/TiN and TaWN/TiN superlattice films, 45
Surface and interface states
Fabrication of a new photoelectric conversion system by using a self-assembling technique, 248
Surface diffusion
Cluster diffusion and surface morphological transitions on Pt(111) via reptation and concerted motion, 179
Surface morphology
Reactive magnetron sputtering of indium tin oxide films on acrylics – morphology and bonding state, 33
Vacuum-deposited films of mesogen of 4-*n*-pentyl-4″-cyano-*p*-terphenyl: their electronic spectra and molecular aggregate structures, 285
Surface roughness
Characterization of titanium dioxide atomic layer growth from titanium ethoxide and water, 163
Surface thermodynamics
An air-stable biomimetic Langmuir–Blodgett bilayer, 294

Tantalum
Bias sputtered Ta modified diffusion barrier in Cu/Ta(V_b)/Si(111) structures, 10
Tb^{3+}-doped zinc silicate film
Deposition and photoluminescence of sol–gel derived Tb^{3+}:Zn_2SiO_4 films on SiO_2/Si, 50
Tellurium films
Deposition of tellurium films by decomposition of electrochemically-generated H_2Te: application to radiative cooling devices, 101
Thermal evaporation
Dark and photoelectric conversion properties of p-MgPc/n-Si (Organic/Inorganic) heterojunction cells, 253
Thermal stress
High temperature cracking of tungsten polycide films on quartz substrate, 307
Thickness
Face centred cubic cobalt ultrathin-layers in Au/Co(111) multilayers: a study by electron diffraction and by HREM, 186
Thin films
Use of artificial neural networks to predict thickness and optical constants of thin films from reflectance data, 122
Thin film structure and morphology
Face centred cubic cobalt ultrathin-layers in Au/Co(111) multilayers: a study by electron diffraction and by HREM, 186
Structural and optical properties of yttria-stabilized-zirconia films grown by MOCVD, 173
Titanium aluminum nitride
Preparation of $(Ti_{1-x}Al_x)N$ films from mixed alkoxide solutions by plasma CVD, 146
Titanium dioxide
Characterization of titanium dioxide atomic layer growth from titanium ethoxide and water, 163
Titanium nitride
Preparation and properties of TiN and AlN films from alkoxide solution by thermal plasma CVD method, 137
Titanium–aluminum–nitride coatings for satellite temperature control, 268
Transmission electron microscopy
In-situ TEM observations of abnormal grain growth, coarsening, and substrate de-wetting in nanocrystalline Ag thin films, 54
Submonolayer and single crystal film from ligand-stabilized silver nanoparticles, 85
Structural studies and influence of the structure on the electrical and optical properties of microcrystalline silicon thin films produced by RF sputtering, 128
Characterization of indium tin oxide film and practical ITO film by electron microscopy, 155
Surface characterization of the monolayer and Langmuir–Blodgett films of tetra-tert-butyl-copper phthalocyanine, 278
Tribology
Supertough wear-resistant coatings with 'chameleon' surface adaptation, 223
Tungsten
Microstructure-related resistivity change after chemical–mechanical polish of Al and W thin films, 96
Tungsten chemical vapor deposition using tungsten hexacarbonyl: microstructure of as-deposited and annealed films, 114
A unified theoretical model for tensile and compressive residual film stress, 232
Tungsten oxide
Characterization of ultrasonic spray pyrolyzed tungsten oxide thin films, 38
Tungsten polycide on quartz
High temperature cracking of tungsten polycide films on quartz

substrate, 307

Wetting
An air-stable biomimetic Langmuir–Blodgett bilayer, 294

X-ray diffraction
Epitaxial aluminum nitride films on sapphire formed by pulsed laser deposition, 1
Preparation and characterization of $Bi_2Ti_2O_7$ thin films by chemical solution deposition technique, 30
Structural studies and influence of the structure on the electrical and optical properties of microcrystalline silicon thin films produced by RF sputtering, 128

Yttria stabilized zirconia
Structural and optical properties of yttria-stabilized-zirconia films grown by MOCVD, 173
